Presenter (Name and Title): Mike Dangers, County Assessor	Estimated Time Needed: 10 minutes
---	---

Summary of Issue:

The Pictometry aerial photography project has been completed and the final product has been available to county staff since late June.

The County's LINK GIS mapping has a new Pictometry version of the standard "ortho" or straight down aerial photos displayed for all internal county government users. The 3D photos that Pictometry is known for, also called the "oblique" images, are also available to internal county government users as a tool within the GIS mapping. These images are used by the assessor's staff daily and it improves their ability to locate improvements and classify property. Other departments are also benefiting from this product.

County staff would like the Board's permission to make the Pictometry standard "ortho" aerial photos available to the public through the LINK GIS mapping. This would not include any of the 3D photos since we know that the Board already decided that these will not be displayed to the public.

Please contact Mike with any questions.

Alternatives, Options, Effects on Others/Comments:

The aerial photography does not need to be made available to the public on the LINK GIS. However, the public will certainly use this photography since it is the best available.

Recommended Action/Motion:

Motion to approve public access to the "ortho" aerial photography provided by Pictometry.

Financial Impact:

Is there a cost associated with this request? Yes No

What is the total cost, with tax and shipping? \$

Is this budgeted? Yes No *Please Explain:*

Legally binding agreements must have County Attorney approval prior to submission.
